

Bind-It™ Decontamination Products

Manufacturer:

SKU#: 8217-10-0100

Bind-It decontamination spray is ideal for general purpose cleanup of nuclear medicine isotopes. Whether in the hot lab, receiving, camera rooms or patient isolation areas, Bind-It does the job.

Product Description

Besides being very economical, Bind-It offers three distinct advantages over other decontamination products: Pleasantly scented - Bind-It spray is formulated with a mild, pleasant scent. No harsh odors, no sulfur smell, no wrinkled noses. Bind-It WILL NOT cloud lead glass - finally a way to clean syringe shields and L-blocks - without damaging or clouding the glass. Bind-It is extremely effective at removing nuclear medicine isotopes, including radio-iodines. Bind-It Spray is also safe to use on delicate well detectors, thyroid probes and camera heads. Bind-It Spray is non-corrosive, so it is equally safe on painted, coated or varnished surfaces. Bind-It works by attracting and binding the isotope, thereby trapping it in solution. This attraction is so powerful, it will even "pull" spilled isotope out of tile grout and other semi-porous surfaces. It is also highly effective as a shield when used to pre-treat surfaces such as bench tops and workplaces where spills are likely. Simply spray the surface and allow to dry. This makes cleanup faster and easier. Bind-It Hand Soap is the ideal choice for Hot Lab use. Bind-It Hand Soap will not dry hands like other laboratory soaps. Bind-it hand soap is pleasantly scented and more importantly - it removes skin contamination. Be proactive, do your hands a favor and ensure ALARA is met every time you wash your hands. Pre-mixed 32oz spray 8oz concentrate 8oz hand soap pump bottle 32oz hand soap dispenser refill
