## Brass Bourdon Tube Pressure Gauge Model DRF22

### Description

The DRF22 pressure gauge series is a versatile bourdon tube based pressure indicating device with brass movement. Stainless steel and brass construction offer a balanced combination of corrosion resistance and value. For easy installation, it is offered with or without panel mounting bezel, and either bottom or rear ports. An optional glycerin filled housing makes the unit suitable for use with media prone to pulsation and vibration while providing increased weather resistance. With ranges from -30" Hg to 10,000 PSIG, it can handle a wide variety of common pressure sensing applications.
