

Ball valves

Single union ball valves

- Fiberglass reinforced Polypropylene body for strength and chemical resistance
- EPDM O-rings handle most fertilizers and chemicals (Viton® available upon request)
- NPT threads, female and male
- Teflon® seats for smooth operation and proper seating
- Maximum operating pressure for sizes through 1 1/4" is 232 psi; for larger sizes 145 psi

Ball valves

Three-way union and three-way union continuous flow ball valves

- Fiberglass reinforced Polypropylene body for strength and chemical resistance
- EPDM O-rings handle most fertilizers and chemicals (Viton® available upon request)
- To prevent overpressure on continuous flow 3-way ball valve, the valve cannot be turned off when selecting directional flow
- Teflon® seats for smooth operation and proper seating
- Maximum operating pressure for sizes through 1 1/4" is 232 psi; for larger sizes 145 psi
- NPT threads, female to female
