

FROZEN BLOCK GRINDERS

Model 1675D

The 16-inch Model 1675D is designed specifically for grinding large, hard-frozen blocks of meat. The 12-inch diameter throat and feed screw will accept blocks up to 9-inches thick (see table). Mounted on a Model 1398-5HB gearbox with 3-point suspension.

Model 1612B

Another 16-inch workhorse with a wider range of applications. See tables. Has an extra heavy-duty Model 13100-5HB gearbox and accommodates up to 150 horsepower if necessary. Use it for pre-grinding thawed meats in addition to the large blocks and hard-frozen prebroken meat. Also available with canted hopper and shorter head such as the Model 1675D.

FROZEN BLOCK GRINDER CAPACITIES

Grinder Model	Gearbox Model	HP	Maximum Size (Inches)	Min. Temp. (F°)	Minimum Reduction (Inches)	Pounds* per Minute
868B	1780-6	50	4x12x16	26	1/8	75
878B	1780-6B	50	5x14x18	26	1/8	100
1167B	1398-5HA	50	5x14x18	26	3/8	200
1109B	1398-5HA	100	6x15x18	26	3/16	200
1109D	1398-5HB	100	6x15x18	10	3/8	150
1109B or D with #2081 hopper			6x15x22	26	3/16	200
16	1398-5HA	100	6x16x22	10	1/2	200
