

**Item description/product images**

**Description**

**Note:**

Complies with the German law on detergents and cleansing agents Section 9. Nontoxic, good smell, not corrosive, flame-proof and biodegradable. Certificate: Institut Fresenius among others; allowed for the important car manufacturers and other companies.

**Application:**

Planofix can be diluted with water in a ratio of 1:1 to 1:25 (1:10 to 1:400 when used in cleaning machines). Mechanical dissolution is only necessary in special cases. Planofix can be used as a replacement for tetrachloroethylene (Per) or trichloroethylene (Tri) Use in an immersion bath, bucket or brush, insertion machines, cleaning machines and spray devices.

**Advantages:**

Economical due to high degree of dilution, requires no heat, works fast and safely, with incredible depth effect.

**Contact time:**

The contact time depends on the degree of contamination. The dirt normally loosens after a few moments, but the contact time may be 5-15 min for thick films.
