6.4. Reference to other sections

Refer to section 13 for disposal advice.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Utilize exposure controls and personal protection as specified in Section 8. Alkaline materials sometimes exhibit delayed effects. Wash immediately after any contact. Launder contaminated clothing before reuse.

7.2. Conditions for safe storage, including any incompatibilities

Do not freeze.

7.3. Specific end use(s)

No special precautions.

8.2. Exposure controls

8.2.1. Engineering measures

No special requirements. If exposure limit is exceeded, provide adequate ventilation.

8.2.2. Individual protection measures

Respiratory protection:	Not normally needed. If exposure limit is exceeded, use an approved organic/acid/base vapor
	respirator (e.g., EN filter type A-P2).

Protective gloves: Waterproof gloves (e.g., rubber, latex, plastic)

None

Carcinogenicity:	As per 29 CFR 1910.1200 (Hazard Communication), this product contains no carcinogens as listed by the National Toxicology Program (NTP), the International Agency for Research on Cancer (IARC), the Occupational Safety and Health Administration (OSHA) or Regulation (EC) No 1272/2008.
Aspiration hazard:	Not classified as an aspiration toxicant.
Other information:	None known

SECTION 12: ECOLOGICAL INFORMATION

Ecotoxicological data have not been determined specifically for this product. The information given below is based on a knowledge of the components and the ecotoxicology of similar substances.

12.1. Toxicity

Not expected to be acutely toxic.

12.2. Persistence and degradability

Polyethylene glycol: expected to be readily biodegradable. D-Glucopyranose, oligomers, decyl octyl glycosides: readily biodegradable. The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) N° 648/2004 on detergents. Data to support this assertion are held at the disposal of the competent authorities of the Member States and will be made available to them at their direct request or at the request of a detergent manufacturer.

12.3. Bioaccumulative potential

Polyethylene glycol: not expected to bioaccumulate. D-Glucopyranose, oligomers, decyl octyl glycosides: low potential for bioaccumulation.

12.4. Mobility in soil

Liquid. Soluble in water. In determining environmental mobility, consider the product's physical and chemical properties (see Section 9).

12.5. Results of PBT and vPvB assessment

Not available

12.6. Other adverse effects

None known

SECTION 13: DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods

Incinerate or landfill absorbed material with a properly licensed facility. Material may be suitable for water treatment. Check local, state and national/federal regulations and comply with the most stringent requirement. This product is not classified as a hazardous waste according to 2008/98/EC.

European List of Wastes code: 20 01 29
