

# RotoClone™ LVN

RotoClone™ LVN collector was designed after the standard RotoClone™ N collector. It is an efficient, compact and economical wet-type dust collector specifically designed for volumetric flow rates of 2,000 CFM (3,400 m<sup>3</sup>/h) or less. Carefully engineered simplicity allows the RotoClone™ LVN to provide an efficient and dependable method of in-plant dust control with minimal maintenance requirements.

The RotoClone™ LVN collector is specifically designed for the ventilation and pollution control of dust emitting machines that require air volumes under 2,000 CFM (3,400 m<sup>3</sup>/h). It can be close coupled to the dust source, or remotely located with connecting ductwork. The fugitive dust from operations such as grinding, buffing, polishing, sanding, bag filing, packaging, sorting and weighing can be controlled without exhausting tempered air. The source capture and dust removal features of the RotoClone™ LVN collector allow recirculation of in-plant air. This helps conserve energy and provides a clean working environment.

## Benefits

- Automatic water level controls
- Low maintenance
- Compact design
- No moving components (except fan)
- Direct drive – no belts requiring changing or adjustment

## Features

- Two nominal sizes 1,000 CFM (1,700 m<sup>3</sup>/h) and 2,000 CFM (3,400 m<sup>3</sup>/h)
- Built-in centrifugal fan
- Standard 14-gauge 304 SS construction
- Large 2" (50 mm) drain coupling for cleaning

## Applications

- Ceramics
- Chemicals
- Foundry
- Metalworking – especially light metals
- Pharmaceutical
- Rubber and plastic products
- Lead battery plants
