

# TRANSTORE<sup>®</sup> VOYAGER XL POLY TANK

STACKABLE LUGS  
FOR ALIGNMENT  
AND SUPPORT

OPTIONAL TOP LIFTING  
PACKAGE AVAILABLE

PATENT NO.  
US D728,732

SLOPED BOTTOM

RECESS  
PROTECTED VALVE

2" BANJO POLYPROPYLENE BALL VALVE  
WITH QUICK DISCONNECT DUST CAP

7" POLYPROPYLENE FILL CAP  
WITH SANTOPRENE GASKET  
WITH VENTED BUNG

535 GAL HDPE  
TRANSLUCENT  
BOTTLE

49" x 57"  
HEAVY DUTY PALLET WITH  
FOUR WAY FORK LIFT  
AND PALLET JACK ACCESS

UN/DOT APPROVED (UN31H2)  
FOR 1.5 SPECIFIC GRAVITY  
14.5 psi TEST PRESSURE RATING

# VOYAGER

## POLY TANK

# XL

- The Voyager XL's innovative design enables the liquid packager to ship 62% more product than a conventional 330 gallon poly IBC.
- The United States Patent office granted patent US D728,732 for the unique bottle and pallet, as well as the combination of bottle and pallet.
- The Voyager XL all poly IBC was developed by engineers using FEA results to ensure safety and longevity of the container.
- The Voyager XL is the largest vertically designed rigid poly IBC to meet UN/DOT certification standards for Packing Groups II and III.
- The bottle and pallet are manufactured with state-of-the-art High Density Polyethylene with UV inhibitor to protect the IBC from ultraviolet light when stored outdoors.
- The unique pallet-to-bottle nesting design of the Voyager XL helps you to maximize your warehouse space by stacking IBCs one on top of another.
- The pallet is accessible on all four sides using both fork lifts and pallet jacks, making handling of this large IBC easy and safe.
- The oversized pallet cradles the bottle, and protects it from items stacked next to the IBC and during rugged handling.
- The Voyager XL can be equipped with an optional overhead lifting package to enable the operator to lift the IBC by overhead hoist or crane.
- Customized colors and graphics for your Voyager XL are available upon request.
- Truckload and offshore/intermodal container capacities:
  - 53' truck: 20 IBCs
  - 20' offshore/intermodal: 4 IBCs
  - 40' offshore/intermodal: 9 IBCs

2" ball valve with quick release outlet

Optional overhead lifting package
