

ROVER No. 515

ROVER is a tradesman's best friend—answering to the demands of your trade.

- If your work has you kneeling or lying down, ROVER is the solution for aching knees, neck and back.
- Portable and versatile ROVER provides comfort and support wherever the job takes you.
- Quickly and securely converts from a kneel mat to a roll for head and neck support.
- Use virtually anywhere! Non-conductive, oil-resistant, silicone-free, flame-resistant and non-marring.
- 100% anti-fungal, the unique Nitricell® material combines vinyl and rubber to provide a comfortable, lightweight and durable product.

HEAD AND NECK SUPPORT

For optimal support, make sure ROVER'S "feet" are inside of the roll. To do this, simply roll ROVER'S "feet" up over his "head" and then tuck them into the slots.

HEAD, NECK AND UPPER BACK COMFORT

Insert a second ROVER'S "feet" into the slots of a rolled ROVER to create a totally unique mat with built-in head and neck support.

Go. Kneel. Lie Down.

KNEEL MAT

ROVER lays flat—even after being rolled up—to provide comfort and relieve stress on your knees.
